DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 15 October 2007 has been entered.

Claim 6 has been canceled.

2. Claims 1-5 and 7-16 are pending and under consideration.

Rejection Withdrawn or Moot

3. The rejection of claim 6 under 35 U.S.C. 112, second paragraph, indefiniteness, is moot in light of the cancelation of the claim.

Rejection Maintained

4. The rejection of claims 1-5 and 7-16 under 35 U.S.C. 112, second paragraph, indefiniteness, is maintained for reasons of record.

Applicants argue that the specification teaches that each mycobacterial infection generates its own specific antibody response to a number of specified antigens resulting in a distinguishing banding pattern for different Mycobacterial species. Thus, by analyzing the banding pattern of antigens recognized by antibodies, the species can be determined.

The examiner has considered applicants' argument, but does not find it persuasive for the reasoning put forth in prior Office Actions. Applicants' argument is directed to a "distinguishing banding pattern" involving multiple antigens and multiple antibodies. However, one of the embodiments of the instant claims utilizes a single antibody and a single IMCRAC.

Art Unit: 1645

Thus, how does one speciate a sample if only the single IMCRAC results in a single type of immune complex?

Conclusion

5. No claims are allowed.
